

Geotechnical FAC Conference Call  
February 13, 2003, 10:00 CST

Participants:

Glenn Kato, TAC  
Paul Madison, MVP  
Bruce Rogers NAP

Paul discussed the lessons learned by his contractor AMEC.

We also looked at the <http://earthsoft.com/default.asp> along with EQuIS, this looks promising. It has modules for gINT, GMS, LogPlot and others.

Paul will contact EarthSoft for more information. We also have a contact at NWS to discuss how EQuIS is doing

Pan Conroy is very happy with the work gINT and GCS is doing with his BLDM interface.

There will probably not be a new GT project for FY04, but concentrate on the existing FY03 Database project.

Glenn Kato
