

Geotechnical FAC Conference Call

July 12, 2001, 12:00 PST

Participants:

Glenn Kato
Eric Matthew
Bill Rochford
Mike Kelley
Paul Madison
Bruce Rogers

1. Infrastructure Conference at Reno

Eric may need funding he will email Glenn, anyone else email Glenn also. We tentatively scheduled for Tuesday 5:30 PM after the Sessions. Another option may be after the sessions on Thursday at 1 PM, although Tuesday would be better for those leaving early. Monday Night I will firm up a room with Jim Truesdale, and somehow post the room no on a bulletin board. I think 1 or 2 hours should be sufficient. Sent email to Jim regarding request.

Mike Kelley will be at Reno for Bryan Cisar.

2. POCs

Good Job. Eric has tentatively volunteered to structure the database, once he takes a look at it.

3. FY02 Project. Take a look at the attached FY02 project up for consideration, and my recommendation.

In summary, looks like we are in general agreement to change the project if it makes the list. On an update, the project did not make the list so it should be a non-issue.

4. GT Boring

We had a general discussion regarding Exploration Logs. With what I would say a summary would be we all do them differently.

Eric Probably not needed to draft logs anymore. The product varies from project to project, more likely to put in specs

Paul, did informal survey, any districts do it differently. They do brief stick logs under alignments. In addition to the detailed log sheets.

Bill, into PDF mostly A/E and put COE format on 8x10 form.

5. Get a Status on CASE Programs, we have an email regarding this, and should have some status at Reno.

End
