Glenn Kato provided a quick overview of the GTFAC committee, the current GT Database FY04 project and the current Corps initiative to obtain Corps Geotechnical digital data.

Paul Madison explained the current stage of the Corps Geotechnical database inventory scope.

Rodger Tellefson suggested that a geologic module be treated separately, if we do have one.

Laurel Gorman had the following input.

Require an ODBC connection

Careful of requiring Oracle

HQ Geology database POC

1998 Survey on input methods.

Will work on Center POC's.
