

Systems Administrator Conference Call  
April 20, 1999, 10:00 CST

1. Cadd Knowledge Base Web Pages: Glenn Kato (Seattle District) is the POC for maintaining the different FAC group pages on the Cadd Knowledge Base Web page. Each FAC is responsible for the content of their page. Mary Diel (Sacramento District) is the POC for the Knowledge Base (Cadd Survey). Contact her for passwords so that you can start adding data to the survey. Let's make an effort to get data into the survey. A lot of hard work was put in to making the survey, it is up to us to make it usable.
2. The Tri-Service File Manager projects consists of developing a MicroStation file naming utility conforming to file naming methods presented in the Tri-Service A/E/C CADD Standards. It will also include tools for managing CADD files. The contractor provided an early look and feel sample of the project for comments in early April. If you would like to get on the review list for future looks at the File Manager project, e-mail John Kincaid and he will add you to the list.
3. John Kincaid requested that each system manager go through the list of proposed FY2000 projects and send him you list of top 10 choices for funding. He will be attending the SAC and Tri-Service FWG meetings the first and third weeks of May and the projects are the topic of the meetings.
4. Workspace update: We need someone to take the lead in collecting samples for the Workspace User training. If you are interested, please e-mail John Kincaid.
5. Next meeting: May 18, 1999, 10:00 CST, Phone # (404) 562-4365.
